MN Police Association comment on Stillwater crime scene and officer involved shooting

(St. Paul, Minn.) – Minnesota Police and Peace Officers Association General Counsel Imran Ali said, “Preliminary information reveals law enforcement officers responded to calls for help and were immediately met with gunfire becoming an active shooter scene where multiple victims were injured, a gas line was broken - all while children and more were in the vicinity.

This, once again, illustrates the grave danger posed to law enforcement, communities, and the decisions that must be made, in a split second, to preserve life.

Our thoughts and prayers are with the responding officers and deputies for responding in the face of danger and putting their lives on the line. Their actions remind us of all the officers statewide who help victims of crime and keep the public safe every day.”
